

Are you tampering with **your** life?

Surprisingly, some individuals
are risking their lives by:

- Altering safety features on their propane tanks
- Filling portable propane cylinders from bulk tanks
- Making do-it-yourself modifications to any portion of their propane system

Tampering is Dangerous and Illegal

Keep yourself, your family, your property, your local fire fighters and propane providers in your community safe.

Consult your local, trained and certified propane expert for all changes with your propane system.

Use Propane Safely

Go to www.UseMichiganPropane.com
and click on Propane Safe Handling Program

The logo for the Michigan Propane Gas Association features the word "Michigan" in a large, elegant, cursive script. Below it, the words "PROPANE GAS ASSOCIATION" are written in a smaller, clean, sans-serif, all-caps font, enclosed within a thin rectangular border.
